

Quote for Ngene software

This document provides a formal quote for the Ngene online software. The prices are valid until 30 June 2025.

All our licences are individual single-user licences. The licences vary on three dimensions:

Duration. Ngene licences are subscription based, with 1 and 3 year durations available. We do not have automatic renewal of licences: you have full control over whether to renew a licence or not. The licence provides access to all new features that are released during the subscription.

Tier. There are two tiers of licence available: standard and advanced. An advanced licence additionally supports efficient designs with Bayesian priors, and a range of advanced design features including mixed logit designs, designs with covariates, model averaging etc. A full comparison of features is listed at <https://ngene.choice-metrics.com/license-options>

Academic use. We have prices for both academic and non-academic use. An academic license can only be used for academic purposes, such as academic research and teaching. It cannot be used for commercial purposes, including contract research and consulting.

Our current pricing is:	1 year	3 years
Academic standard licence	\$299USD	\$599USD
Academic advanced licence	\$399USD	\$799USD
Regular (non-academic) standard licence	\$449USD	\$899USD
Regular (non-academic) advanced licence	\$599USD	\$1199USD

Our preferred means of payment is credit card. For customers who require an invoice or paperwork (other than this quote) before purchase, or who would like to pay via bank transfer, a \$50USD surcharge will be charged.

If you wish to proceed with a purchase, please follow the purchasing instructions at <https://www.choice-metrics.com/pricinganddownloads>

Regards
Andrew Collins
